Full of different and unique jewels to color. can't go wrong! 0 of 0 people found the following review helpful. Well worth the money By Mrs. La Holland Tamara's work is awesome have many of her images a joy to colour x

One of the most popular items to color these days are gems and leaves. Gemistry combines these two items in 20 whimsical designs for you to color. Little warning up front: Most of the designs are intricate with some very small spaces. The illustrator is ok with photocopying the designs on preferred paper, so everyone can color with their own color medium of choice.
