1 of 1 people found the following review helpful. MesmerizingBy DianaThis is a coloring book that invites to be picked up, thumbed through, purchased, and loved because it evokes such curiosity--People will not even realized what it is at first that grabs them except that they like what they feel and will want to know more. What a treasure for people in their personal growth at their own pace one image at a time.These coloring books are not just for passing time they invite you to another dimension of coloring you might not have thought possible. Each person experiences these images differently as an energetic shift, a connection to a part of themselves, the kind that takes your breathe away and fills up your heart. Coloring the image, seeing it transform, rotating the paper to see it from many different angles evokes something beyond the ordinary experience of coloring. It is as if I have just experienced timelessness with an element of my own soul as I color. I cannot recall having ever had an experience of this kind from a coloring

book. I actually made two of the images my iPhones lock screen and background wallpaper. Every time I pick up my phone, the eyes are staring back at me. For a split second I experience a knowing with the image, even in the midst of scheduling my work. This series of books is a must have and will give you joy exponentially. 1 of 1 people found the following review helpful. A Rare Jewel By Iona Selkie Deborah has done it again!
