before purchasing it in order to gage whether or not it would be worth my time, and all praised Greenhouse Gardening: Step by Step to Growing Success (Crowood Gardening Guides):

After a lot of searching, I found this book and it answered all my questions. It told me my greenhouse was the perfect size for a beginner, different types of heaters and the advantages and disadvantages of each heater, for the greenhouse, the temperature that should be maintained, and even how to make containers for the plantings. I would reccomend the book very highly to any one interested in having a back yard greenhouse.1 of 1

people found the following review helpful. New to the greenhouseBy Ken LebbonThis book is one that I bought to learn where to start with the greenhouse that I just built. We live in the states and this book focuses on UK weather, but there seems to be some to glean from it. Well written, lots of pictures and explanations. Thank you Jonathan Edwards and thank you for the offer.3 of 3 people found the following review helpful.
