I love growing my own herbs and are becoming intrested in using medical herbs. I like this bulletin because it hits on the basic herbs needed, how to plant them, what they are good for, and MOST importantly what NOT to do with them. It gives good basic inforamtion and if you feel this is something you want to get more involved in you can purchase a more detailed book. If you decide you do not want to do this you have spent \$4. Great little books!!!!!!!2 of 2 people found the following review helpful. From earthworms, to herbs, to splicing fruit trees, we recommend these bulletins to those who would rather Not lug around the 20 lbs 'gardening for dummies' yellow book.1 of 1 people found the following review helpful. Make a nice presentBy Dobrin'aThis little book contains a decent amount of information on the herbs that may come in very handy when antibiotics and other "traditional" medication is not available. Very helpful and easy to remember.
