Juming Tang, Elizabeth Mitcham, Shaojin Wang, Susan Lurie : Heat Treatments for Postharvest Pest Control: Theory and Practice (Cabi International) before purchasing it in order to gage whether or not it would be worth my time, and all praised Heat Treatments for Postharvest Pest Control: Theory and Practice (Cabi International):

Due to the nature of agricultural commodities as carriers of exotic pests, importing countries have employed varying

methods of pest control for postharvest products. Thermal treatments are emerging as effective, environmentally-friendly alternatives to traditional methods, eliminating chemical residues and minimizing damage to produce. This book provides comprehensive information of these increasingly important treatments, covering temperature measurement, heat transfer, physiological responses of plants, insects and pathogens to heat, and an introduction to current and potential quarantine treatments based on hot air, hot water, and radio frequency energy.
