Melanie Millett : Hey Doodle Doodle Book: Nephi's Life before purchasing it in order to gauge whether or not it would be worth my time, and all praised Hey Doodle Doodle Book: Nephi's Life:

Here's a great book for children to have fun with as they learn about the scriptures. Your child can read the story of Nephi while following the step-by-step instructions to draw each part of the story. This book is wonderful for those reverent times at home or at church when you need an activity to keep a child quiet but focused on the gospel. It's the perfect size to tuck away for church, and it fits right on the back of an LDS hymnal! You might even find that it is entertaining for adults.

About the Author Melanie Millett loves children and has taught them for over twenty-five years in both church and grade school. Teaching art and music is her first love. She enjoys creating new ideas to make art fun and interesting for children, and she believes that learning to love art at a young age is very important. Melanie lives in Payson, Utah with her husband Robb. Between them they have seven children and are proud new grandparents.
