Historic Vehicles i MinatureBy Elizabeth A MertesAs a person who makes 1/9 scale wagons this is a great inspiration! What a wonderful refernce guide for novices!2 of 3 people found the following review helpful. very disappointed in book as this book only showed the vehiclesBy kiebo3very disappointed in book as this book only showed the vehicles, I was expecting blueprints on how to build anyone of the pictures but no avail. So you have to guess how to build a minature vehicles.

Ivan Collins, an Oregon genius, researched, planned, and built 62 of the most accurate, meticulous, and beautiful model horse-drawn vehicles to be found anywhere. Collins focused his considerable artistry on 1/8 scale vehicles that helped to settle the western United States. Collins's Brougham, Concord coach, Albany sleigh, phaeton, omnibus, Victoria, medicine wagon, and other models have enchanted visitors to the exhibit of his models at the Oregon Historical Society in Portland for over three decades. This book is a catalogue of Collins's works, with photographs of each model, model dimensions, and brief information about the model and the historical vehicle it represents. It also includes an overview of Collins's life and work and sample details of several of his plans.

About the Author Ron Brentano was the curator of technology and field representative at the Oregon Historical Society.
