It is a no-nonsense guide to being (as the title says) chic and elegant straight from a French woman. I found the author through her charming YouTube videos and instantly liked her savvy approach to elegance. She does have very strong opinions about style and has no trouble telling you what she approves of and doesn't approve of (which is, in itself, so French- j'adore!) Reading this book is like having a conversation with a stylish woman whose secrets you've always wanted to learn. Written with humor and panache!

Great for my age (44) and for transitioning into a more conservative look due to age appropriateness. French older ladies look amazing. Thin and chic. I wish there were more details about coordinating actual outfits and styling colors and prints, brown shoes, black shoes, basic color palettes, incorporating funky young pieces into a mature outfit....maybe Ms. Lacoer will do another book with some photos and hands on outfit styling!!!! I lived in France and in Spain for ten years and I never realized Europeans match their handbags to their shoes! Now I notice how unmatched and colorful all us Americans dress!

The basics - nicely put together and to the point By Celine Derudder All right, so quite many things mentioned in this book will seem obvious or be well known already to a lot of readers. I guess. But it's a very good summary to safe, lasting choices, and sound advice. I already read "The little black book of style" and I didn't think they overlapped - both were interesting and brought good tips, which is what I wanted from this book. I'm a native French speaker and I thought the short quotes in French were hilarious - very "prim little lady" but to the point. (You're safe using them in public).
