I have only been a woodworker for a few years, but I should have read this book on day one. I've made some very common mistakes that could have been avoided had I learned the tips herein early on. VERY insightful and intuitive advice!I especially like the use of simple-

to-craft jigs for simple tasks (tasks that take 3-4 times as long if you DON'T have such a jig to use).I'm buying a few copies as gifts for other woodworker friends.I heartily recommend the book.Also - just noticed a Norm Abram book with almost the same name - haven't checked it out yet, but am buying it today to compare.0 of 0 people found the following review helpful. Five StarsBy Gary HutchinsonToplin is one of the good woodworking writers. Writes clearly and has experience0 of 0 people found the following review helpful. A practical compendium of layout and measuring "how to".By Marco PoloI have read this whole book several times. As I have gone deeper into wood working my questions have increased and problems to be solved have grown deeper and more complex. This book will cover most layout and measuring factors. From how wide a pencil lead mark is to the practical layout of complex shape. There are numerous practical examples and photos. Includes what to do when measurements go wrong. Even corrective suggestions on how to lengthen a miss cut piece. I am sure parts of this book will be relevant to many of the most experienced worker of wood.

The First Book a Woodworker Needs!Professional woodworker Jim Tolpin offers solid instruction on the principles of measurement and proportion, walking you through every step of the woodworking process. From design and layout to developing a cutting list, his easy-to-follow style introduces a variety of tools (new and old) used to transfer measurements accurately to the wood. You'll learn the best cutting techniques, how to prevent mistakes before they happen, and for those unavoidable mistakes, you'll learn how to fix them so no one will know!

About the AuthorJim Tolpin has been a pro cabinetmaker and woodworking journalist for 30+ years, during which he's discovered many tricks and secrets for better ways to work. He's the bestselling author of many woodworking, home building, remodeling, carpentry, and tool books. Len Churchill's illustrated many building, tool, woodworking and furniture-building books. He also does work for magazines like Popular Woodworking, Canadian Woodworking and Canadian Home Workshop.
