Mike Miller : Month-By-Month Gardening in Missouri before purchasing it in order to gauge whether or not it would be worth my time, and all praised Month-By-Month Gardening in Missouri:

1 of 1 people found the following review helpful. This book may contain useful info but it is so poorly organized that it ...By Suzanne Iverson This book may contain useful info but it is so poorly organized that it is very difficult to use. It is just to-do lists by plant category (trees, annuals..) and if you want to know what to do in say, April, you need to flip all over the book and use massive quants of post its, or type out your own list to actually get month by month help. No pictures. I would not recommend it. 1 of 1 people found the following review helpful. No Photos To do list is available for free from other resources By Mark I ordered this book thinking that there would be examples of the recommended plants. But Nooooo. I have been trying to find a book that would be a reference guide on ornamentals that would give me bloom from early spring to hard freeze. Well I got just what was in the description. MBM Gardening "LIST" in Missouri. What I need is more help in creating a planting guide with individual pictures to give me help in creating a floral display that will give me color for the entire year in a state that ranges from zone 5a to 6 and with weather from

a windy dry plain to a deciduous rainforest. This is not the book I wanted. I will donate it to the local Master Gardener Library. Maybe they could use it for a coaster or something. 1 of 1 people found the following review helpful. GoodBy Carol song I like the month-by-month breakdown but it drives me crazy to see typos in published material and this one has some pretty easy to spot typos!! On the good side though, it is good the way the sections are broken down. You can go straight to the information you are seeking.

Never garden alone! The Month-By-Month series is the perfect companion to take the guesswork out of gardening. With this book, you'll know what to do each month to have gardening success all year. Written by authors in your state, the information is tailored to the issues that affect your garden the most.

About the Author Mike Miller has more than 35 years experience as an interior and outdoor landscape designer after being educated at University of California (Santa Barbara) and San Diego State. Past stints include the horticultural staff at Missouri Botanical Garden (teaching evening classes for 30-plus years for the adult education and master gardener programs), a faculty member at St. Louis Community College at Meramec, and a co-founder of a predatory insect store. Miller is a Missouri State-licensed pesticide applicator for ornamental plants, lawn/turf and aquatic environments and was also a garden center general manager with a Missouri State Nurseryman certification. Mike's media and speaking engagements include being the host (since 1994) of the year-round weekly KMOX / CBS Radio Garden Hotline and podcasts. The audience is at all gardening skill levels and interests ranging from one houseplant to an entire landscape. Additionally, Mike has spoken at University of Illinois seminars, Missouri Department of Natural Resources, and participated in numerous citizen and community advisory boards. Miller is the author of five garden books published by Cool Springs Press including Missouri Gardener's Guide and Missouri Month-by-Month Gardening. He's written numerous articles featured in the St. Louis Post Dispatch and Fine Gardening magazine, and maintains his website at www.mikemillerdesigns.com. A native of St. Louis, Mike and his wife Tracy Ann make their home in the Christy Park neighborhood. There, Mike entertains family, friends, and neighbors with ever-changing landscape concepts and plants, growing just about every type of plant that can be grown.
