As yet, I haven't had a chance to implement his gardening and planting tips, but I'm hoping they turn out better than some of the money-saving recipes for every day supplies he puts forth. Here are the ones I had problems with: 1) using liquid dish soap in your dishwasher instead of the product made for it. Labels on liquid dish soap state specifically not to use the product in a dishwasher; 2) the laundry detergent ingredients are quite pungent and are no match for the famously hard water found in Utah -- the mixture didn't clean that well; 3) since there were no specific directions on how much fabric softener to put on a piece of cloth instead of using dryer sheets, (I used a large knotted square of old flannel and Downey liquid softener) the result was disappointing. It felt like the cloth that absorbed the softener, not the clothes; and 4) the toothpaste ingredients were messy and left stuff stuck in my teeth. I understand you sacrifice convenience with homemade money-saving substitutes, but the payoff wasn't there for me despite carefully following directions. These

issues aside, I found the book well-written with a tight layout and very good photo illustrations. Mr. Warnock's philosophy for self-sufficiency and passion for passing it on to his grandkids and others is admirable. But I feel it's a bit like trying to make yourself into a good dog trainer by reading books and watching videos. The experts always end up making it look much easier than it is. 0 of 0 people found the following review helpful. This book really made me think about how unfortunate we are to not have these skills. How we have become dependent on can good, preservatives, and too easy to become lazy. It reminded me of my grandmother grandfather and the crops they grew and had right a hand. How wonderful it all tasted. Really great book to get ideas from to become more self sufficient and plan ahead for our families. --An absolute fantastic read that helps get you on the right track to getting chemicals out of your life and taking care of yourself. I love so many of the tips and recipes here and am still dying to try others. one step at a time I guess --I have many of this author's books and this one does not disappoint. I would definitely recommend it to anyone who is interested in sustainable living topics. --About the Author Caleb Warnock is the popular author of "Forgotten Skills of Self-Sufficiency", "The Art of Baking with Natural Yeast", "Backyard Winter Gardening For All Climates", "More Forgotten Skills", "Trouble's On The Menu", and the Backyard Renaissance Collection.
