From Time Life Education : New Living Spaces (Home Repair and Improvement (Updated Series)) before purchasing it in order to gauge whether or not it would be worth my time, and all praised New Living Spaces (Home Repair and Improvement (Updated Series)):

1 of 1 people found the following review helpful. Great Little Book By B. Luce This is a great little book. Lots of great info and specs. My father is a retired builder and I've done a lot of work with him while I was growing up. This book shows a lot of proper procedure etc, and it keeps me from having to call and bug him with silly questions when I'm doing a project. While I've done quite a bit of building / remodeling in the past, sometimes when working with people "in the business", you sometimes just "follow along and do things" without really knowing the actual process. OR.... sometimes you just want to know some of the things that many people just "skip over" after years of doing this kind of work. I was actually amazed at how many things people do incorrectly just because (even though they are in the

business), they were never taught the basics correctly. It's a decent reference book.

NEW LIVING SPACES New Living Spaces shows you how to modify old rooms and create new ones from attics, basements, garages, and porches with the latest techniques and materials, step-by-step directions, safety advice, and hundreds of color illustrations. Learn the methods the professionals use so you can... Put up a new wall - or remove an old one Replace an outside window with a door Convert a garage into a room Add a ceiling Construct a sturdy subfloor over a slab Create new spaces with sliding doors Cut and install wallboard like a pro Insulate an attic room ...and more
