This book gives an interesting overview of how to build all sorts of shelters from a simple lean-to to a log cabin. He throws in simple details that I had tended to overlook, such as the different ways of jointing and joining a log cabin's logs. Another example is how to clay in a wooden chimney so that it will not catch fire.

This is very helpful, with several designs of shelters to select from. Many of these could be used for extended periods of time. I found it easy to read and understand the techniques for building these.

By Wendy Valderman
A great read for young and old from an appropriate source, one of the founders of the Boy Scouts of America. It comes with instructions on building various shelters each with helpful and fun illustrations. I would say this book is for anyone, specifically younger fans of the outdoors. If you're a camper looking for a helpful guide to stick in your backpack i'd definitely recommend this.
