**Potteries Museum : Slipware in the Collection of the Potteries Museum Art Gallery** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Slipware in the Collection of the Potteries Museum Art Gallery:

Historically, slipware was the predominant type of ceramics in Britain for over 400 years and this work has influenced subsequent work in North America and Australia. This book is a survey of the slipware collection of the Potteries Museum in Stoke on Trent which is amongst the finest in the UK and perhaps the world. It consists of a short essay and 300 high quality images of the finest pieces in the collection. There is no other book on this subject in print and so this incredibly important book on such an exceptional collection will be in high demand.

'This beautifully illustrated book is a survey of the slipware collection of the Potteries Museum in Stoke-on-Trent.'

London Potteries Newsletter (Dec 2007) 'A very readable and attractive book.' Kent Potters Association Newsletter (Jan/Feb 2008) "Well written and beautifully presented, this is an excellent book with a reservoir of information for connoisseur and amatuer alike" Western Morning News(May 2008)About the AuthorThe Potteries (Hanley) Museum has one of the best collections of slipware in the world.
